In this talk, I will review the recent history of deep learning and music information retrieval research. Music classification -- such as genre or instrument classification -- will be the main focus, along with some related topics, e.g., transfer learning and audio preprocessing. A short introduction to the audio and music research in Spotify will follow.

Keunwoo Choi is a research scientist in Spotify USA and working on music research. He received a PhD degree from Queen Mary University of London, UK, in 2018. He also worked in Electronic Telecommunication Research Institute, Korea, with more focus on applied acoustics and audio signal processing. He received his master and bachelor’s degrees from Seoul National University, in 2011 and 2009 respectively. He won the Best Paper Award in ISMIR 2017.

Abstract

In this talk, I will review the recent history of deep learning and music information retrieval research. Music classification -- such as genre or instrument classification -- will be the main focus, along with some related topics, e.g., transfer learning and audio preprocessing. A short introduction to the audio and music research in Spotify will follow.
